

Over 10,000 cameras injected in the IP network since 2000.

High definition solutions are managed by video over IP platforms installed at servers, **with three years warranty in situ.**

In line with the requirements for the management and number of video signals, the BFi SERVER family is divided into:

All BFi SERVER management servers incorporate:

Virtual Matrix with management of external keyboards with joystick.

Recording in real time (25ips) of each of the video signals.

A minimum of 5 client stations.

Graphic environment.
